

## Equipment Servicing

PLUNGE prides itself on the quality and speed of our equipment servicing. We have a 7-day service guarantee for the following services:

- Regulator clean and service
- BCD service
- Hydrostatic testing of cylinders (you need to do this every 12 months in Australia)
- Oxygen cleaning and valve service (available at a reduced cost if undertaken with a hydrostatic test)

We have 2 fully qualified life support service technicians working at PLUNGE, so all servicing is done on the premises. Both are factory qualified and experienced in servicing all brands of scuba equipment and are happy to answer any of your questions. We only use factory approved servicing parts.

### Air Fills, Nitrox & Trimix

PLUNGE's air is triple filtered, clean air. We have a filling water trough to ensure you get the fattest of fills. We offer Nitrox and Trimix that is filled by qualified gas blenders.
